HARDWARE REQUIRED FOR AI BASED INSPECTION QUALITY

1)

Parameter	Details
Component	Zebronics USB Camera
Type	USB Webcam
Brand	Zebronics
Function	Captures images and video of the bottle
Purpose	Provides visual input for AI-based quality inspection
Application	Bottle defect, deformation, water-level and visible-spillage
Input to	Laptop/Computer

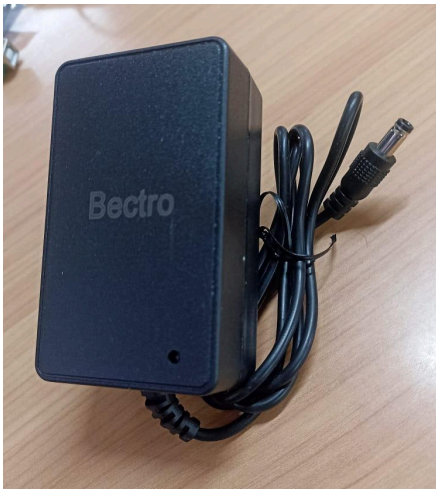

2)

Parameter	Details

Component	USB Relay Module
Type	USB-controlled Relay Module
Board Marking	USB-Relay-1
Relay Model	JQC3F-05VDC-C
Interface	USB
Function	Electrical load switching
Purpose	Provides computer-controlled switching
Application	Indicator/load control

3)

Parameter	Details
Component	Bectro Power Adapter
Type	AC/DC Power Adapter
Brand	Bectro
Function	Provides DC electrical power
Purpose	Supplies power to compatible electronic components
Input	AC supply
Output	DC supply
Output Rating	To be confirmed from the adapter nameplate

4)

Parameter	Details
Component	Green Signal Lamp
Model	AD16-22DS
Type	LED Signal Indicator
Colour	Green
Function	Provides visual indication
Purpose	Indicates the selected system status
Mounting	Panel-mounted

5)

Parameter	Details
Component	USB Cable
Type	USB Data and Power Connection
Function	Connects the camera to the laptop
Purpose in Project	Transfers camera data to the computer
Application	Provides real-time camera input
Importance	Connects the vision sensor with the processing unit
Requirement	Sufficient cable length for camera positioning
